

# HILAH AYERS

Please be advised that power will be restored, and the entrance gates will be reactivated on Friday, April 28<sup>th</sup>. Kindly keep to roadways as much as possible, and exercise discretion when driving/parking on the grass as snow remains throughout the property and certain areas are still quite soft. Upon resort reopening, tenants will have until the end of May to remove belongings from the storage area before in-season charges retroactively apply. Continued storage arrangements must be made through the office.

Ground conditions are being monitored daily and water will be turned on as soon as it is safe to do so but refrain from connecting hoses to onsite bibs until then to prevent further delays. The shower house along with its fill station are operational for tenant use in the interim. Although the associated well was appropriately flushed following treatment, water should not be immediately consumed out of an abundance of caution.

Fees and fully executed lease agreements are due May 1<sup>st</sup>, so payments and completed contracts need to be received by the deadline to avoid restricted access and utility disconnection. Finally, if you are able and haven't already done so, please join the [Campers@HilahAyersPark](#) Facebook page, as it is a fantastic source of information for park-related events, activities and initiatives, but updates will be published on the homepage of our website and emailed to members for ongoing reference. Bring on the camping season!
